Trim 6 × 4 in · with bleed 6.25 × 4.25 in · this page 8.05 × 6.422 in (notes area outside the bleed)

TRIM (cut) BLEED SAFE AREA

How to use: 1) Set your document to CMYK, at the full size with bleed. 2) Put your design on the ARTWORK layer and run background colours and photos out to the red BLEED line. 3) Keep text, logos and anything important inside the blue SAFE AREA. 4) The magenta TRIM line is where we cut. 5) Delete or hide the guide layers before you export a print-ready PDF with bleed. Questions? print@printoutlocal.com Use the same template for the back. If you are mailing it, leave the right half of the back for the address and postage, and keep the bottom 5/8 in clear for the postal barcode.
