Presentation folder · 9 × 12 in, two pockets

Flat dieline 19 × 16 in (two 9 × 12 in panels, two 4 in pockets, 1/2 in glue tabs) · with bleed 19.25 × 16.25 in · this page 22.45 × 20.41 in. GUIDE TEMPLATE: confirm the dieline with us before printing.

CUT · FOLD / SCORE · GLUE TAB · CARD SLITS · BLEED · SAFE AREA

How to use: 1) Set your document to CMYK, at the full size of this page. 2) Put your design on the ARTWORK layer and run backgrounds out to the red BLEED line. 3) Keep text and logos inside the blue SAFE AREA on each panel and pocket. 4) Black solid line = CUT, green dashed = FOLD / SCORE, purple = GLUE TAB, magenta = business-card slits. 5) This is the OUTSIDE of the sheet: pockets fold up to the inside, so art on the pockets must be upside down here. 6) Delete or hide the guide layers before you export a PDF. This is a guide template: confirm the dieline with us before printing. Questions? print@printoutlocal.com
